

Dear Dr. Hide,

The following manuscript has been submitted for publication in Optics Communications:

A. Penzkofer, W. Holzer, H. Tillmann and H.-H. Hörhold  
Leaky-mode emission of luminescent thin films on transparent substrates  
Manuscript number WS 2841 (Please see pdf attachment)

I would very much appreciate your opinion on the suitability of the paper for Optics Communications. Of particular importance are (i) the originality and correctness of the work, (ii) proper acknowledgment of related research, and (iii) clarity and conciseness of expression.

Optics Communications aims to provide short publication times to authors, and therefore I would be grateful if you could return your report to me as soon as possible but no later than August 27. The report should be written constructively and tactfully, suitable for direct transmission to the author. You should state whether:

- The manuscript is suitable for publication in its present form.
- The manuscript is suitable for publication after minor revision.
- The manuscript must be revised and re-reviewed before acceptance.
- The manuscript should be rejected for publication in Optics Communications.

I would be pleased to receive your report by fax or electronic mail to our E-mail address [optcom@physik.uni-ulm.de](mailto:optcom@physik.uni-ulm.de) <<mailto:optcom@physik.uni-ulm.de>> if convenient. There is no need to return the manuscript unless you have written comments for the author(s) on it. If you are not able to review this paper yourself, could you please let me know as soon as possible, by telephone, fax or electronic mail, suggesting other reviewers if possible.

Thank you very much indeed for your help.

Sincerely,  
Wolfgang Schleich
